Pearl River Valley Electric minimally affected by Hurricane Nate

Pearl River Valley Electric suffered only minimal damage as Hurricane Nate moved through its 12-county service area during the early morning hours of October 8. At the height of the storm, fewer than 200 member-consumers lost service. PRVEPA crews in the Columbia and Wiggins districts worked during the night to restore service as those scattered outages arose.

As daylight arrives, crews will assess the system to ensure there is no additional damage. After that, the Association will respond to any requests for assistance from neighboring electric power associations.

Any members experiencing an outage may call 855-2PRVEPA (855-277-8372).

This will be the final release regarding Nate.
