Pearl River Valley Electric virtually unaffected by TS Gordon

Pearl River Valley Electric suffered only a handful of outages as Tropical Storm Gordon moved through small portions of its 12-county service area during the early morning hours of September 5. PRVEPA servicemen in the Wiggins district worked during the night to restore service as those scattered outages arose.

“We were extremely fortunate with the path Gordon ultimately took as it moved inland,” said Randy Wallace, general manager. “Not much of our service area was affected and, thankfully, there was no damage to respond to. We’ll stand by this morning to respond to any requests for assistance from neighboring electric power associations.”

As always, any members experiencing an outage may report it on PRVEPA’s app or website, or by calling 855-2PRVEPA (855-277-8372).

This will be the final release regarding Gordon.
